International Journal of Forecasting 9 (1993) 593–594
Elsevier Science Publishers B.V., Amsterdam

Author Index Volume 9 (1993)

(The issue number is given in parentheses)

Ascher, W., The ambiguous nature of forecasts in project evaluation: Diagnosing the over-optimism of rate-of-return analysis (1) 109–115

Bridges, E., K.B. Ensor and **J.A. Norton,** Forecasting the number of competing products in high-technology markets (3) 399–405
Brodie, R.J., *see* **D.I. Simester** (1) 49– 60
Brown, L.D., Earnings forecasting research: its implications for capital markets research (3) 295–320
Brown, L.D., Reply to commentaries on "Earnings forecasting research: its implications for capital markets research" (3) 343–344
Brown, P., Comments on 'Earnings forecasting research: its implications for capital markets research' (3) 331–335
Bunn, D.W. and **A.I. Vassilopoulos,** Using group seasonal indices in multi-item short-term forecasting (4) 517–526

Chatfield, C., Editorial: Neural networks: Forecasting breakthrough or passing fad? (1) 1– 3
Chatfield, C., *see* **S. Makridakis** (1) 5– 22
Cogger, K.O., *see* **A. Stam** (4) 487–508
Cullity, J.P., Monitoring business conditions at the CIBCR (1) 39– 48

De Alba, E., Constrained forecasting in autoregressive time series models: A Bayesian analysis (1) 95–108
De Bondt, W.F.M., Betting on trends: Intuitive forecasts of financial risk and return (3) 355–371
De Grip, A., *see* **E.J.T.A. Willems** (2) 173–185

Edlund, P.-O. and **S. Karlsson,** Forecasting the Swedish unemployment rate. VAR vs. transfer function modelling (1) 61– 76
Elkhafif, M.A. and **A.A. Kubursi,** The demand for gasoline: a two stage approach (4) 457–465
Elkhafif, M.A.T., Energy forecasting models, simulations and price sensitivity: New formulation (2) 203–210
Ensor, K.B., *see* **E. Bridges** (3) 399–405
Entorf, H., Constructing leading indicators from non-balanced sectoral business survey series (2) 211–225

Franses, P.H. and **G. Romijn,** Periodic integration in quarterly UK macroeconomic variables (4) 467–476

Gardner, Jr., E.S., Forecasting the failure of component parts in computer systems: A case study (2) 245–253
Gélinas, R. and **P. Lefrançois,** On the estimation of time-series quantiles using smoothed order statistics (2) 227–243
Gerlow, M.E., S.H. Irwin and **T.-R. Liu,** Economic evaluation of commodity price forecasting models (3) 387–397
Goodwin, P. and **G. Wright,** Improving judgmental time series forecasting: A review of the guidance provided by research (2) 147–161
Griggs, K., *see* **M. O'Connor** (2) 163–172
Guerrero, V.M., Combining historical and preliminary information to obtain timely time series data (4) 477–485

Harris, J.L. and **L.-M. Liu,** Dynamic structural analysis and forecasting of residential electricity consumption (4) 437–455
Hibon, M., *see* **S. Makridakis** (1) 5– 22
Holmes, R.A. and **A.F.M. Shamsuddin,** Evaluation of alternative leading indicators of British Columbia industrial employment (1) 77– 83
Hotta, L.K., The effect of additive outliers on the estimates from aggregated and disaggregated ARIMA models (1) 85– 93

Irwin, S.H., *see* **M.E. Gerlow** (3) 387–397

Karlsson, S., *see* **P.-O. Edlund** (1) 61– 76
Klein, P.A., Geoffrey H. Moore and dynamic statistical methods (1) 31– 37
Kolb, R.A. and **H.O. Stekler,** Are economic forecasts significantly better than naive predictions? An appropriate test (1) 117–120
Kubursi, A.A., *see* **M.A. Elkhafif** (4) 457–465

Lawrence, M., *see* **S. Makridakis** (1) 5– 22
Lee, R.D., Modeling and forecasting the time series of US fertility: Age distribution, range, and ultimate level (2) 187–202
Lefrançois, P., *see* **R. Gélinas** (2) 227–243
Liberatore, M., *see* **T. Miller** (4) 509–515
Liu, L.-M., *see* **J.L. Harris** (4) 437–455
Liu, T.-R., *see* **M.E. Gerlow** (3) 387–397

Makridakis, S., Accuracy measures: theoretical and practical concerns (4) 527–529
Makridakis, S., C. Chatfield, M. Hibon, M. Lawrence, T. Mills, K. Ord and **L.F. Sim-**

mons, The M2-Competition: A real-time judgmentally based forecasting study (1) 5– 22
Meade, N., Forecasting the return and risk on a portfolio of assets (3) 373–386
Miller, T. and **M. Liberatore,** Seasonal exponential smoothing with damped trends. An application for production planning (4) 509–515
Mills, T., *see* **S. Makridakis** (1) 5– 22

Norton, J.A., *see* **E. Bridges** (3) 399–405

O'Connor, M., W. Remus and **K. Griggs,** Judgemental forecasting in times of change (2) 163–172
O'Hanlon, J., Commentary on: Lawrence D. Brown "Earnings forecasting research: its implications for capital markets research" (3) 321–323
Ord, K., *see* **S. Makridakis** (1) 5– 22

Elsevier Science Publishers B.V., Amsterdam

Subject Index Volume 9 (1993)

(The issue number is given in parentheses)

Accuracy (3) 345
Aggregation (3) 345
ARIMA models (1) 77, (2) 255, (4) 437, 477
Autoregressive models (1) 95, (4) 487

Bayesian forecasting (1) 95
Bayesian vector autoregression models (3) 407
Bootstrapping (1) 49
Business cycle (2) 211
Business cycle indicators (1) 31
Business cycle surveys (1) 31

Change (2) 163
Coincident index (1) 39
Cointegration (1) 61
Combining forecasts (2) 245
Commodity prices (3) 387
Compatibility statistic (4) 477
Competition (3) 399
Confidence intervals (3) 355
Constrained (1) 95, (2) 187
Criminal sentencing (1) 49

Damping parameters (4) 509
Decomposition (2) 147
Demand for gasoline (4) 457
Demographic (2) 187
Development projects (1) 109
Diffusion index (1) 31
Divisia Price Index (2) 203

Earnings forecasting (3) 295, 331, 345
Earnings response coefficients (3) 325
Earnings time series (3) 325
Econometric forecasting (1) 49
Economic evaluation (3) 387
Effect of additive outliers (1) 85
Efficient markets (3) 325
Electricity consumption (4) 437
Electricity prices (4) 437
Empirical competitions (1) 5
Energy conservation (4) 437
Energy demand forecast (2) 203
Estimating aggregated models (1) 85
Evaluation (1) 61, (3) 387
Exponential smoothing (2) 245, (4) 509

Fertility (2) 187
Forecast accuracy (1) 5, (3) 295
Forecast bias (1) 109
Forecast combination (4) 477
Forecast evaluation (1) 61
Forecasting (3) 387, (4) 467, 487, 517
Forecasting aggregated observation (1) 85
Forecasts (1) 77, (2) 187
Fractional differencing (2) 255
Fuel efficiency (4) 457
Fuel substitution (2) 203
Future research (3) 295

Gasoline forecasting model (4) 457

Investor psychology (3) 355

Judgmental forecasting (1) 5, (2) 147, 163

Labour market (2) 173
Leading index (1) 39
Leading indicator (1) 77, (2) 211
Long-range prediction (2) 255

M-Competition (1) 5
Market association (3) 295
Market timing (3) 387
Marketing (3) 399
Minnesota prior (3) 407
Model selection (1) 61
Monitoring forecasts (2) 245
Monte Carlo (1) 95
Multivariate (4) 517

Noise traders (3) 355

Optimal forecast (4) 477
Order statistics (2) 227
Out-of-sample simulation (2) 203
Outliers (1) 85
Overreaction (3) 355

Periodic processes (4) 467
Post-earnings announcement drift (3) 295
Precision share (4) 477
Predictive distribution (1) 95
Price elasticity (4) 457
Price sensitivity (2) 203
Product lines (4) 517
Production planning time series forecasts (4) 509
Project evaluation (1) 109
Projection (2) 187

Quality of judgement (2) 147
Quantiles (2) 227

Regression analysis (2) 245
Replacement demand (2) 173
Retailing (4) 517
Returns–earnings relation (3) 331
Rounding errors (4) 487

Seasonal unit roots (1) 61
Seasonality (2) 255, (4) 437, 467, 517
Security analysts (3) 331
Sequential signals (1) 39
Six month smoothed (1) 39
Spectral methods (2) 211
Statistical and smoothing composite index (1) 31
Stock returns (3) 325
Survey data (2) 211
Synchronization (3) 345

Technology (3) 399
Theil *U* statistic (3) 407
Time series (1) 5, (2) 147, 227, (4) 487
Transfer function models (1) 77, (4) 437
Turning points (1) 61, 77
Two-stage optimization (2) 203

Unit roots (4) 467

Weather conditions (4) 437
